UI/UX: Ant design, Shadcn, SCSS, Tailwindcss

API & Data: REST, React Query, JSON,

Tools & Practices: Git, Docker, Beekeeper, Agile (JIRA)

📁 PROFESSIONAL EXPERIENCE

Associate Software Engineer

12/2024 – Present | Lahore, Pakistan

SevenStacks

- Currently handling **three projects simultaneously**, balancing priorities and ensuring steady progress across all deliverables.
- Contributed to the development of a large-scale messaging platform under senior supervision, gaining hands-on experience in collaborative software delivery.
- Build a HIPAA-compliant doctors' portal and admin dashboard to securely manage patient records, integrating ChatGPT API for intelligent support, prompt processing, and protected streaming responses.
- Customizing Bolt.dev for a client by integrating advanced AI capabilities with OpenAI API, AWS Bedrock, and Groq. Implementing real-time chatbot interactions and AI-driven workflows with dynamic content rendering using React Markdown, token streaming, and conditional logic.
- Developing a full-featured society management system to handle payments, expenses, and operational workflows, aimed at improving transparency and automation for community administration.
- Contributing to an ongoing healthcare project focused on Alzheimer's disease, supporting innovation in medical research and patient care solutions.
- Maintaining clean Git workflows with branching, pull requests, reviews, and conflict resolution in Agile teams, ensuring smooth collaboration and version control.
- Continuously optimizing performance, accessibility, and responsiveness across applications to ensure seamless user experience on all devices.

🎓 EDUCATION

University Of Sialkot

2020 – 2024 | Sialkot, Pakistan

Bachelor of Software Engineering
