📄 SUMMARY

Results-driven Software Engineer with a track record of delivering scalable and high-performing applications. Skilled in optimizing workflows, ensuring seamless user experiences, and maintaining clean, maintainable code. Known for adaptability and commitment to delivering solutions that align with business goals and user needs.

🧠 TECHNICAL SKILLS

Frontend: React, Next, TypeScript

Backend: Express.js, Nest.js

Database: MongoDB, PostgreSQL

State Management: Redux, Zustand, Context, React Hooks

UI/UX: Ant design, Shadcn, SCSS, Tailwindcss

API & Data: REST, React Query, JSON,

Tools & Practices: Git, Docker, Beekeeper, Agile (JIRA)

Payment integration: Stripe

📁 PROFESSIONAL EXPERIENCE

Associate Software Engineer

02/2025 – Present | Lahore, Pakistan

SevenStacks

- Contributed to the development of a large-scale messaging platform under senior supervision, gaining hands-on experience in collaborative software delivery.
- **AGH Labs** - Build a HIPAA-compliant doctors' portal and admin dashboard to securely manage patient records, integrating ChatGPT API for intelligent support, prompt processing, and protected streaming responses.
- **Rejuuv Marketplace** - Contributed to maintain and enhance platform by fixing critical bugs, optimize code and improve system stability.
- **Eden Orchard** - Developing a full-featured society management system to handle payments, expenses, and operational workflows, aimed at improving transparency and automation for community administration.
- **Bio Hack** - Contributing to an ongoing healthcare project focused on Alzheimer's disease, supporting innovation in medical research and patient care solutions.
- **Animatics** - Implemented the full Stripe payment flow with 3 paid plans and 1 free plan, integrated Stripe webhooks, and added a custom credits system where users can purchase credits (10 credits = \$1) based on their chosen amount.
- Maintaining clean Git workflows with branching, pull requests, reviews, and conflict resolution in Agile teams, ensuring smooth collaboration and version control.
- Continuously optimizing performance, accessibility, and responsiveness across applications to ensure seamless user experience on all devices.

SevenStacks

- Assisted in developing and testing web applications using ReactJS and Express, gaining hands-on experience with the MERN stack.
- Collaborated with senior developers on debugging, feature enhancements, and API integrations for real-world projects.
- Learned Agile development practices by participating in daily standups, sprint planning, and code reviews.
- Worked with Git for version control, practicing branching, pull requests, and conflict resolution.
- Explored basic deployment workflows and environment configuration to understand production readiness.
- Gained exposure to real-world problem-solving in client-driven projects while improving coding standards and documentation.

 PROJECTS

Neon IQ*Next.js, Express.js, MongoDB, Groq Api*

A real-time AI interaction platform that streams responses from the Groq API through an Express backend.

Developed the Next.js frontend and Express backend, enabling seamless live response streaming for an engaging user experience.

Chat bot*whats-app-web, puppeteer*

An intelligent moderation bot for large communities that automatically detects and removes voice messages and links. It issues two warnings immediately to violators and removes them on the third offense. The bot is currently managing 6 groups with 1000+ members each, ensuring a safe, spam-free, and well-organized chat environment.

 EDUCATION

University Of Sialkot

2020 – 2024 | Sialkot, Pakistan

Bachelor of Software Engineering
