

DAUD MIR

Full Stack Developer

☎ +92 3097119974 ✉ dev.daudmir@gmail.com 📍 Lahore, Pakistan

SUMMARY

Full Stack Developer with **1.5+ years** of expertise in developing and optimizing high-performance web applications for dynamic and scalable environments. Proficient in **MongoDB, Postgresql, Express.js, React.js, Next.js and Node.js, Nest.js** with a strong ability to build robust, intuitive, and user-centric applications. Skilled in cloud deployment on **AWS EC2** and integrating secure, seamless payment solutions using **Stripe**.

SKILLS

Languages — Javascript, Typescript

Frontend — React.js, Next.js, Tailwind, ShadCN

Backend — Supabase, Express.js Nest.js, Prisma/TypeORM

Databases — PostgreSQL, MongoDB

Cloud & DevOps — AWS (EC2, S3), Git, GitHub

State Management — Redux, Context

Integrations — Stripe, OpenAI , NextAuth, OAuth, SerpAPI

EXPERIENCE

Associate Software Engineer, *SevenStacks*

12/2024 – Present
Lahore, Pakistan

- Developed an **AI-powered medical education** application for students, delivering structured topic results including Overview, Key Points, Causes, Signs & Symptoms, and Diagnosis.
- Designed and developed a fully functional **AI-powered chat** test window for the admin panel of a mobile application.
- Developed an **AI-powered smart search** feature enabling users to query in natural language and receive dynamic, filter-based search results, improving search accuracy by **~80%**.
- Delivered a **HIPAA-compliant** doctor's portal and admin dashboard for secure patient record management.
- Implemented end-to-end **encryption and decryption** of API responses using **Supabase** as the backend, reducing data breach risk by **~90%** which ensures protection of sensitive user information.
- Integrated **TanStack Query** to replace manual data fetching, reducing duplicate API calls by **~80%** and improving UI responsiveness by **~30%**
- Managed AWS **EC2** deployment and maintain production server environments.
- Built a baby product price comparison application using **SerpAPI** and **Supabase** with real-time data retrieval.
- Implemented end-to-end **Stripe** payment flow with 3 paid plans, Stripe **webhooks**, and a custom user credits purchase system.
- Maintained Git workflows including feature branching, pull requests, code reviews, and conflict resolution.

Frontend Developer, *Ahmasoft*

09/2024 – 12/2024
Lahore, Pakistan

- Developed and delivered **2+** production-ready web applications using **React.js** and **NextJS** within a 3-month tenure.
- Integrated **Stripe payment gateway**, implementing end-to-end payment flows based on client requirements.
- Consistently met project deadlines, contributing to **on-time delivery** across all assigned projects.

PROJECTS

Tapn Trade - POS Management System, *React.js, Nest.js, PostgreSQL, TypeORM*

- Built a full-stack Point-of-Sale system with multi-role access control (Super Admin, Store Admin, Cashier).
- Implemented product/inventory management, sales transaction processing, and user account administration.
- Developed a comprehensive analytics dashboard with interactive charts for sales performance, revenue trends, and inventory status.

WhatsApp Community Moderation Bot, *Node.js, whatsapp-web.js, Puppeteer*

- Developed an intelligent automated moderation bot that detects and removes policy-violating messages in large group chats.
- Deployed bot across 6 active groups with 1,000+ members each, enforcing a 3-strike removal policy for rule violations.

Certificates

Full Stack development using MERN

(Udemy)

EDUCATION

Bachelor of Software Engineering, *University of Sialkot*

2020 – 2024
Sialkot, Pakistan
